Subject: About the settlement

hi, like an user of Microsoft Products, i have to say that the settlement reached by microsoft and the DOJ with the 9 of 18 states is a joke, MICROSOFT is not only allowed to keep doing their ANTI COMPETITIVE activities, this will not help the consumers at all, how can someone say that if microsoft is break in 2 parts is going to hurt the economy? what kind of joke is that??? MICROSOFT is destroying the economy by just being there and doing what they do all the time! the economy grows if there is a way to compete arround!, the economy grows when someone decides to create a product and start selling and doing some competition, but with microsoft arround like that.... no one will have the chance to even take a product to the market because microsoft will buy them or..... wors and the most common strategy by microsoft that is....."adding a new feature to the OS" and that feature is the one that is created by this new company, so, with this kind of market, go will want to compete if they know that they will be doom anyway or another? they can loose because microsoft haves the money to make you loose, or they can loose because microsoft haves the most sold OS arround, they just have to bundle a new feature and the company is dead, So now tell me, how this deal will benefit the consumers? if i will still not have the right to choice what ever i want? when i use winamp i know that some day it will not be manufactured because loose of money, and what i have? windows media, and so on so on so on, whats next?

how much time we have to wait until someone realises that MICROSOFT IS NOT THE ANSWER TO THE ECONOMI? i hope for the good of every consumer out there, that this deal between the DOJ, 9 states and the HUGE MONOPOLY OF MICROSOFT is cleared, and a new one.... the one that is proposed by "rebel" 9 states is taken as the remedi, please, hear what the people haves to say, not what some idiots that dont know what is to use a computer... whe dont need to benefit microsoft, whe need to benefit the consumers, and with the settlement that the DOJ accepted, the consumers are not happy at all.

that is all i have to say.

Matias Moyano.
